PROCESS CHILLING FOR ANY INDUSTRY

Emergency water chiller rentals can eliminate costly downtime when finding a replacement water chiller

Australian water chiller manufacturer Matsu Chilling Systems announces its short term rental plan for emergency chillers up to 20 kW cooling capacity.

The rental plan allows customers who have an emergency water chiller break down situation to quickly get their factory running again while the water chiller specification is worked out.

"In the last three rental cases we have had, we have had a chiller ready for dispatch before our customer has even had time to get the order through their purchasing department." Matsu Chilling Systems General Manager Daniel Rollston said.

"We have saved our customers literally thousands of dollars in lost production because of fast response times." Mr Rollston said. "Because Matsu Chilling Systems is the manufacturer of the water chillers, specialised custom units can even be tailored to suit a customer emergency situation virtually overnight."

Matsu Chilling Systems manufacture process water chillers for any industrial application. Located in St Peters, Sydney, Matsu Chilling Systems can be contacted on 61 2 9698 4666 or at www.matsu.com.au
